

Community Rating System Program

Lexington County is a participant in the Community Rating System Program (CRS) administered by the Insurance Services Office (ISO). Lexington County has adopted higher regulatory standards for floodplain management in order to qualify for different levels of reduced flood insurance rates. These higher regulatory standards and floodplain management activities implemented by the County qualify flood insurance policy holders in the unincorporated areas of Lexington County for a 10% discount in flood insurance premiums. This translates into an approximate savings of \$58 per policy or aggregate savings of \$59,000 in the community. Lexington County's Community Rating number is an 8 which should be indicated on your policy. Should your policy specify anything different, please contact your insurance agent to correct the error and insure you are receiving a discount.
