Planning Commission	Robert “Wally” Price, III	9

Responsibilities: Prepare and/or revise a comprehensive plan and program for the development of the county.

Note: Since the Planning Commission is a quasi-judicial body, persons with an interest in matters going before the Commission should technically not contact them on an individual basis in order to influence their vote on the matter. This would be akin to someone with a case before a magistrate or circuit court judge contacting them in an attempt to influence their ruling prior to the trial. This was taught during the annual training sessions as required by State Code. The proper opportunity for person to speak to the Commission is at the public hearing where the Commission as a whole can be addressed.
